Further, utmost care has been taken to ensure that the opinion expressed therein contain its perceptions on most of the important trends having a material impact on the Company's operations.

The opinions expressed by the management may contain certain forward-looking statements in the current scenario, which is extremely dynamic and increasingly fraught with risk and uncertainties. The Company undertakes no obligation to publicly update or revise any of the opinions or forward-looking statements expressed in this report, consequent to new information, future events, or otherwise. Estimation and expectation made in the Report may differ from actual performance due to various Economic conditions, Government Policies and other related factors.

BACKGROUND & INDUSTRY OUTLOOK

Year under review started with the backdrop of the markets recovering from the slow-down. The Company increased its presence in the Automotive (safety and non safety products) and Silicon based thermoplastics segment. The Company prioritized its focus on Silicon-enhanced products and identified new opportunities in Engineering polymer markets. Thermoplastic Elastomers sales in India continued to grow at a steady rate by converting some of the non TPE applications to TPE. The Company managed to hold the margins in an increasingly competitive market and during the global economy slowdown through a mix of innovative products, selective price increase and qualifying alternate raw materials.

OVERVIEW

It has been recognized world over that India is one of the fastest growing economies. The relevant markets for Multibase are growing steadily and we expect that the Company will benefit from this. The business prospects for the Company are good with increased volumes in these market segments. Increased competition and uncertainty in the world petrochemical markets could put some pressure on margins, since there could be the double effect of raw material price rises as well as pressure from competition. Company produces a range of both commodity and specialty products which are used in a wide range of applications in markets such as Automotive, Personal Care, Personal hygiene, Stationery, Telecommunications and Engineering Polymers etc. The Company continuously develops new generation products through its modern R & D plant in Daman to stay ahead of the competition. Global grades are now being produced in Daman to address the requirement of Automotive sector.

FINANCIAL REVIEW

The overall performance of the Company for the current financial year improved significantly as compared to previous

financial year in spite of various challenges faced during the year such as overall slow-down of economy, high inflation and increase of prices of imported raw materials and commodities globally. During the year under review, the Company reported gross revenue from operations of Rs. 4976.78 lac as against Rs. 4307.63 lac during the FY 2011-12. The Company reported Profit Before Tax of Rs. 653.87 Lac and Profit After Tax of Rs. 448.97 Lac as against Rs. 335.01 Lac and Rs. 219.65 Lac respectively for the previous Financial Year, thereby reporting an increase of 95% and 104% respectively.

RISKS AND CONCERNS

The threats faced by your Company in achieving its future targets may be due to pressure on pricing due to severe competition and aggressive posturing by competition; both domestic and international. This may affect the margins to an extent. In addition, the uncertainty in the global political, economic and stock market scenarios affected the cost of the raw materials used by the Company. We expect our eminent position as the number one supplier of these products due to our ability in identifying and meeting the customers' expectation in terms of quality, fast reaction time, new developments etc.

The Risk, which the Indian Plastics Industry foresees are possible slow down of Indian and global economy, myths and misconceptions about plastics and its impact on environment and increased competition from the foreign manufactures. The other risk which prevails in the industry are high fluctuations in the prices of raw materials, technology obsolescence and competition from the global players.

The Company being a part of Dow Corning Corporation, has always come out with positive mitigations against such risks and has been successful in maintaining its leadership position.

HUMAN RESOURCES AND INDUSTRIAL RELATIONS

The Industrial relations with workmen during the year were normal. The Directors place on record their appreciation for the sincere and efficient services rendered by the executives, staff and workmen of the Company and are confident that they will continue to contribute to the Company's prosperity and growth.

INTERNAL CONTROL SYSTEMS

The Company has put in place adequate system of internal control measures in all risk areas, implemented by the management towards achieving efficiency in operations, optimum utilization of resources and effective monitoring thereof and compliance with applicable laws.

These measures are in the form of procedures/ processes set by the management covering all critical and important areas. These controls are periodically updated and are subject to review by internal auditors. Internal audit function has been outsourced to independent firm of Chartered Accountants who submit quarterly reports to the Board. The Audit Committee of Directors reviews the report of the Internal Auditors and recommends steps to be taken to tighten up internal controls.
